Issue 5

MICRO SWITCH Safety Limit Switches for Hazardous Locations

DESCRIPTION

When the application requires a safety limit switch for hazardous environmental areas which potentially include explosive gas, dust, or fibers, Honeywell offers GSX Series safety limit switches that provide a preferred solution for the hazardous environments while monitoring gate positions. The GSX Series of safety limit switches incorporate the same internal contact block as the Global Safety Limit Switch (GSS Series). All normally closed contacts are positive opening .

A wide variety of contact blocks and actuator head combinations solve many applications.

The GSX Series safety limit switches are certified for weather-sealed indoor and outdoor environments and are also certified for continuous or intermittent use in hazardous/explosive environments through a number of different independent agencies for global applications.

DIFFERENTIATION

- Up to four electrically independent contacts (Zb) per limit switch for monitoring of gates
- Designed and agency evaluated for safety functions up to and including a safety integrity level 3 (SIL3)
- Safety industrial limit switch globally certified for hazardous/explosive environments and environmentally sealed
- Gold-plated contacts available for integrity of switch contacts in hostile environments with low energy applications
- Side rotary actuator head incorporates dual bearing design for increased mechanical life

FEATURES

- Safety limit switch typically suitable for global hazardous/explosive environments with cULus, ATEX, CE, IEC Ex, INMETRO, and KOSHA/KTL certifications
- Up to four normally closed (NC) contacts per switch or a combination of NC and normally open (NO) contacts per limit switch
- NC contacts are positive opening  for positive mode monitoring of gates
- NO contacts available for signal circuits or negative mode monitoring of gates
- Red switch body for easy safety recognition
- Choice of actuator head types: top pin plunger, top roller plunger, top roller lever, or side rotary
- Different threaded conduit options for global applications

POTENTIAL APPLICATIONS

Access panels, gates, guards, or doors on machinery for:

- Grain elevators and grain processing facilities
- Hydrocarbon and ethanol facilities
- Chemical processing
- Paint booths
- Pharmaceutical processing
- Power generation plants
- Pulp and paper processing

PORTFOLIO

Honeywell offers other safety “limit” switches which include the non-

contact safety switches (FF Series) and cable/rope-pull safety switches (1CPS & 2 CPS Series).

Honeywell safety interlocking switches include the metal-body EN50041 GK Series, metal-body solenoid (trapped key) GKL/R Series, the plastic-body EN50047 GKE Series, miniature plastic-body GKM Series, and plastic-body GKN Series.

For other hazardous location applications, Honeywell offers a wide range of limit switches in different size packages and hazardous environments. These limit switches include the BX/BX2 Series, CX Series, EX Series, LSX Series, GXS Series, and 14CE100 Series.

Honeywell

SAFETY LIMIT SWITCHES FOR HAZARDOUS LOCATIONS, GSX SERIES

TABLE 1. SPECIFICATIONS	
CHARACTERISTIC	PARAMETER
Description	GSX Series safety limit switches for hazardous areas (explosive environments)
Agency certifications	See Table 3
Housing material	Electrostatic epoxy coated aluminum body and zinc actuator heads
Actuator heads	Side rotary with various lever options, top pin plunger, top roller plunger, top roller lever
Conduit/electrical connection	0.5-14 NPT, 20 mm, PG 13,5, G1/2 (PF1/2)
Contact/switch options and types ¹	1NC/1NO snap action, slow action BBM, or slow action MBB 2NC slow action 2NO slow action 2NC/2NO snap action, slow action BBM 2NC/1NO slow action BBM 3NC/1NO slow action BBM 4NC slow action
Contact design	Double break, electrically separated (Zb); 2NC/2NO snap action, each pole requires same polarity (Za)
Contact material	Silver alloy (standard), gold-plated (optional for low energy applications)
Utilization category	Snap action contacts: AC-15, A600; DC-13, Q300 Slow action contacts ³ : AC-15, A300; DC-13, Q300
Rated operational voltage (Ue)	120 Vac, 240 Vac, 600 Vac, 250 Vdc
Rated operational current (Ie)	6 A, 3 A, 1.2 A, 0.27 A
Thermal current (Ith)	10 A
Rated insulation voltage (Ui)	300 V, 600 V
Rated impulse withstand voltage (Uimp)	2500 V
Short circuit protection device (SCPD)	Class J fuse (10 A/600 V)
Pollution degree	3
Environmental sealing	IP67; NEMA 1, 3, 4, 12, and 13
Operating temperature	-40°C to 70°C [-40°F to 158°F]
Shock	50 g per IEC 60068-2-27
Vibration	10 g per IEC 60068-2-6
MCTF (Mechanical life)	>1,000,000 cycles with single-sided confidence limit of 100%
MCTF (Electrical life)	>25,000 cycles with single-sided confidence limit of 100%
SIL capability ²	SIL3 capable with HFT =1, SIL2 capable with HFT =0 with reference to IEC61508-2:2010
Proof test interval	1 year

1. All normally closed contacts are positive opening 

2. HFT (Hardware Fault Tolerance).

3. Slow action 1NC/1NO contacts: AC-15, A600; DC-13, Q300

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.

WARNING IMPROPER INSTALLATION

- Consult with local safety agencies and their requirements when designing a machine-control link, interface and all control elements that affect safety.
- Strictly adhere to all installation instructions.

Failure to comply with these instructions could result in death or serious injury.

WARNING MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
